History of the Fort Macleod Golf Club

Golf was first played in Fort Macleod in 1890; this was the first course to be built between Winnipeg and the West Coast. The area 250 yards from the first tee was used until about 1924 by the N.W.M.P. as a pistol and rifle range, shells can still be found on the side hill.

In 1924 H.R.H. the Prince of Wales played golf on this course. The present society of our 9 hole course was formed in 1936. Because of the historical significance, approximately half of the course is a historic designated area.

In 1910 Dr. George Kennedy was president of the club and memberships cost \$ 5.00 for men and \$ 2.00 for ladies. In 1919 a member of the club, Thomas Gillespie, won the Alberta Open Championship and went on to win a Gold Medal at the Royal and Ancient Golf Club of St. Andrews, Scotland.

The trail coming down the coulee by no. 1 tee box and which is still very visible on no. 9 fairway is part of the old wagon trail to Calgary and was used by settlers from the Porcupine hill.

2016 Clubhouse Renovation Project

This year we started a clubhouse renovation project. With the help of our loyal members, supportive guests and many great and many hardworking local companies we were able to add a new exposed concrete patio, install new tin around the outside of the building, build a storage shed, replace the cooking unit and have the clubhouse painted. We have a few tasks left to do but we are working very hard and plan to have them finished soon.

These new and exciting changes have made a very big impact and brought a buzz and some excitement to the season. Like the many great and long lasting projects before ours, this project would not be possible without everyone that offered their help, resources, material and support.

We cannot express how grateful and appreciative we are, we want to thank everyone for their support. We are trending in the right direction and it's all because of you.
